Poorva Rathi (918182790)
Phuong Tran
Sunny Srijan
Chris Eckhardt (915736372)
Jimmy Chen (916260831)

Project Title:
Switter

## Project Description:

This program website will be similar to Twitter where users can post messages and have other users like their posts. However, only registered users can either like or post and also show how many active users are currently on the website. Registered users can also comment on the posts, but only registered users. Users can also search up other users and see what they have posted recently, or first posted. If a user has already registered, they will click the signup button, or if the user is returning and wants to log in, they will click the login button. If the registered user wants to leave, they will log out.
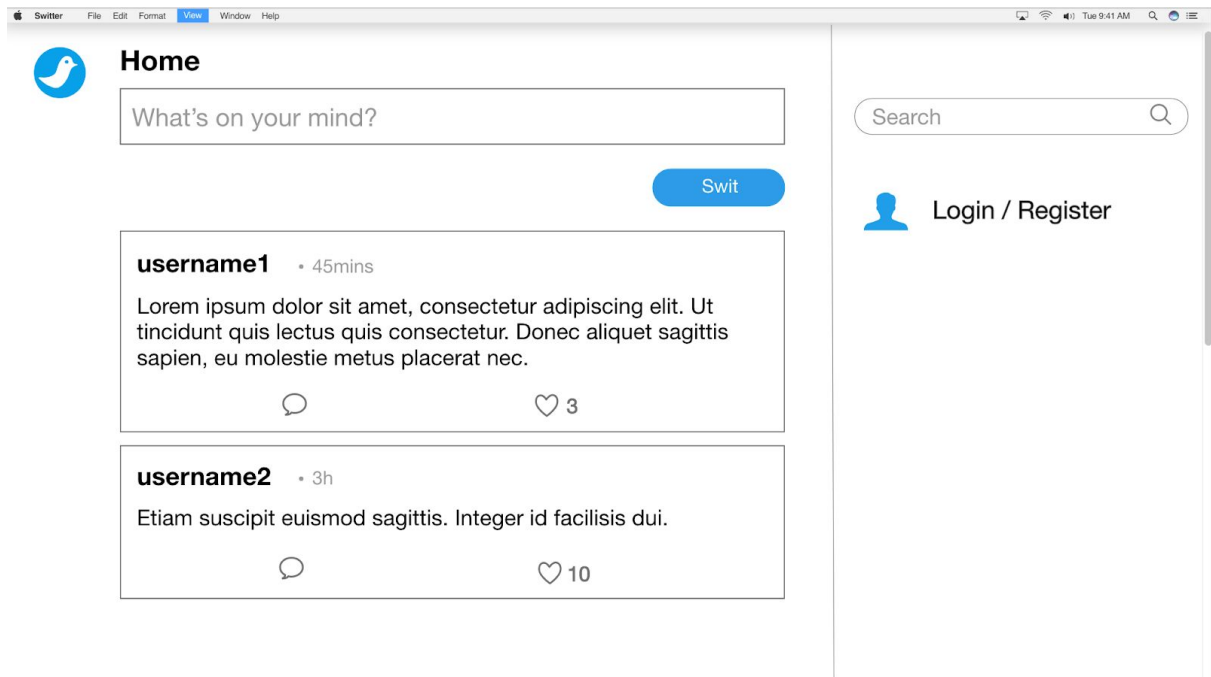

UI Mockups:

The design layouts of each page of the website are as follows:

Homepage for Registered Users:
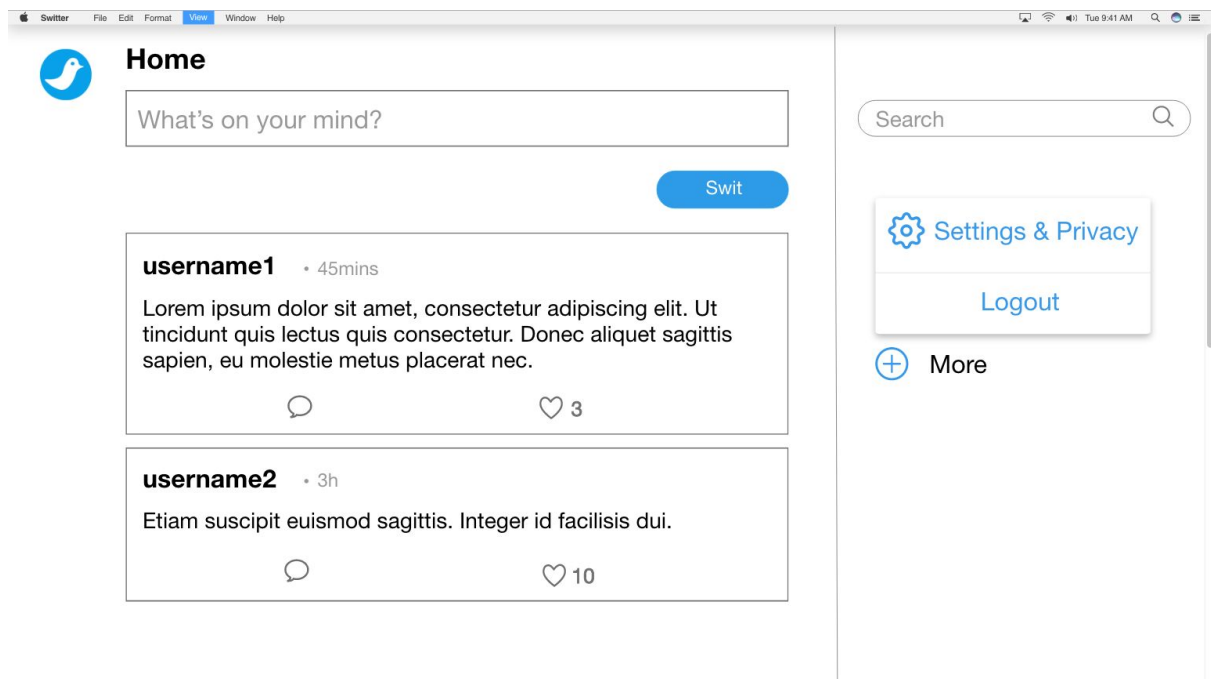

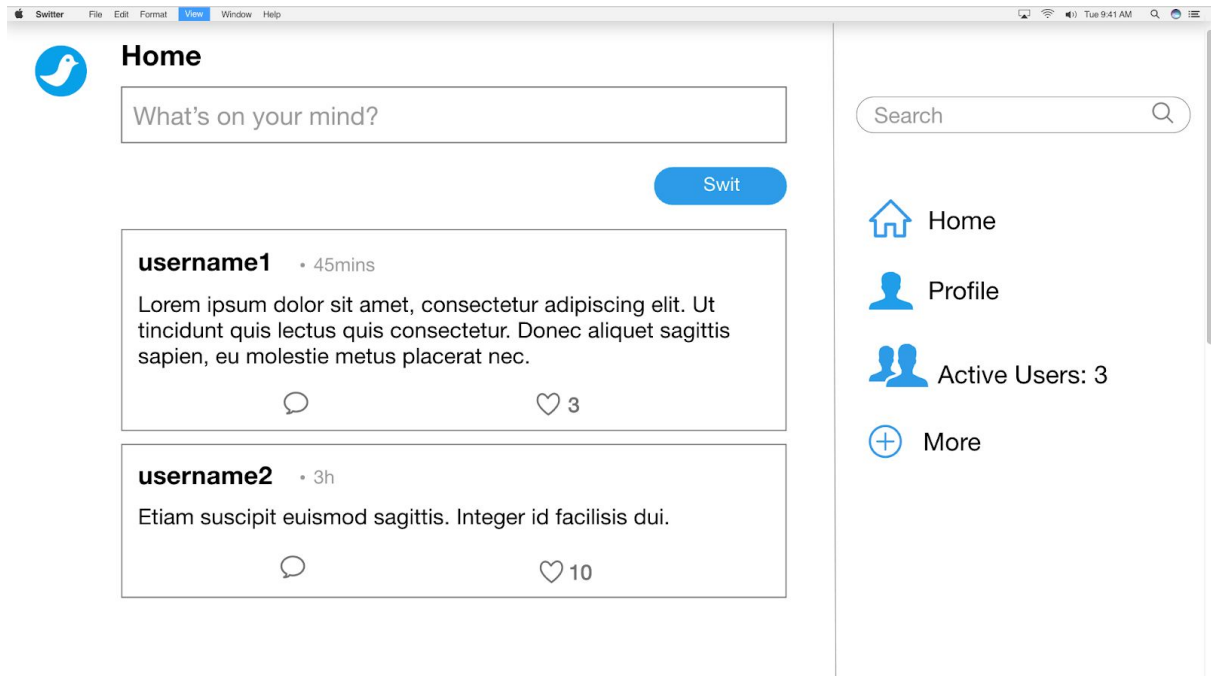

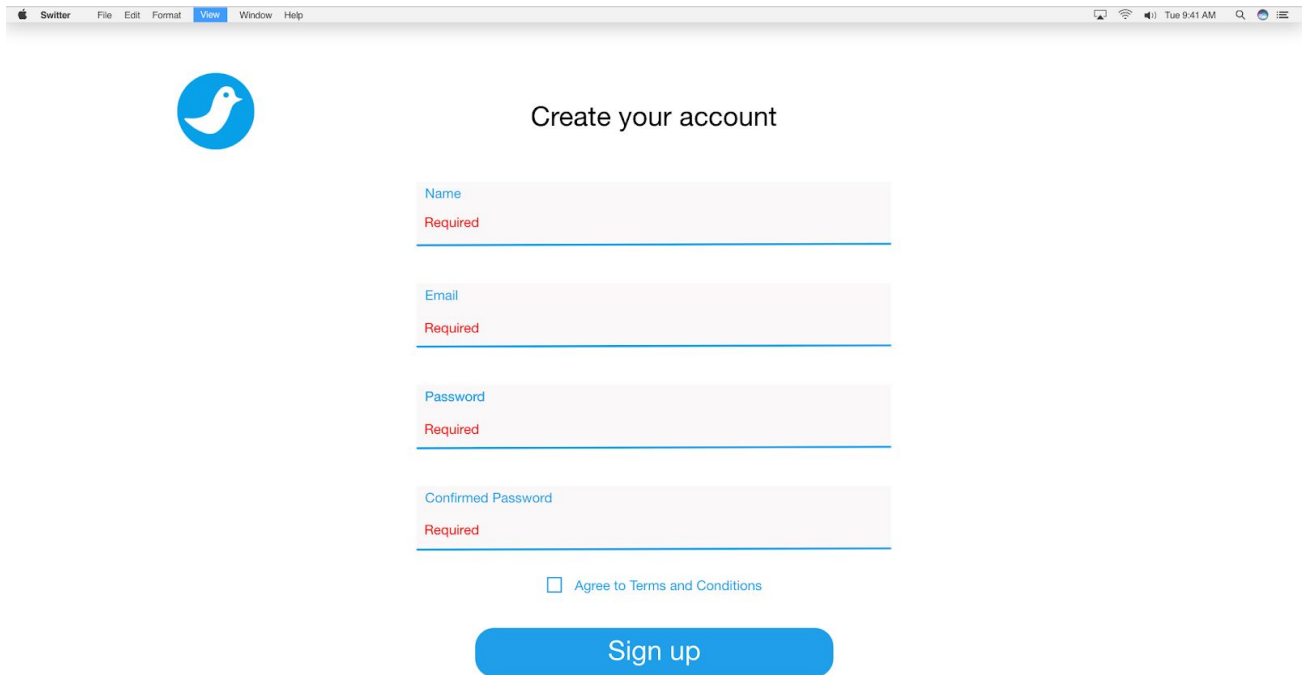

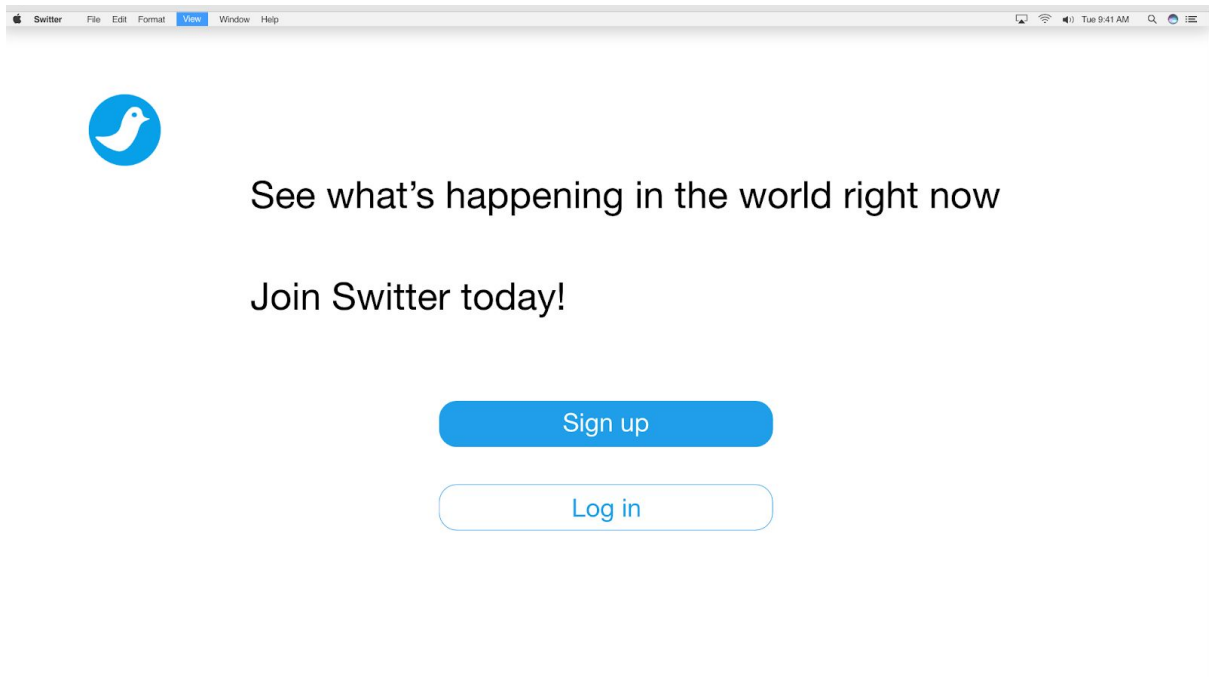

Homepage for Unregistered Users:
